# Langenhoe Community Primary School

## Administration of Medicines Policy

### Introduction

We recognise that most pupils will need medication at some time in their school life. Although this will mainly be for short periods, there are a number of children with chronic conditions, who may need medication throughout their school life. It is often possible for parents to arrange for medication to be taken outside school hours; however there will be times when it will be necessary for children attending school to be given medication during the day.

In order to enable children receiving medication to attend Langenhoe Community Primary School it has been agreed that:

.  
if parents have provided the school with full information about a medical condition and have completed the appropriate permission;

.  
or in the case of chronic or life threatening medical conditions adequate advice and training has been

received by members of staff from the Health Authorities and an appropriate plan defining the management of the pupil is in place;

The school will consider administering medicines prescribed by a doctor.

The school will exercise reasonable care to avoid injury in discharging their 'loco parentis' duty.

## **Confidentiality**

Details about a pupil's medical condition will not be disclosed without the consent of the parents and pupil.

## **Procedure for the administration of medicine**

Where possible, parents should be encouraged to ask the GP to prescribe medication in dose frequencies which enable it to be taken outside school.

Each individual case will be assessed by the school with regard to the need for staff training prior to the start of the administration of medication. Support and advice will be sought from the School's Health Service when necessary.

In complex cases the parent may be asked, or allowed, to visit the school to administer the medication themselves.

Where pupils are likely to need long term medication the school will draw up an individual Health Care Plan in conjunction with the parents and where necessary the child and a member of the medical profession. The plan will set out in detail the measures needed to support a pupil in school, including preparing for an emergency situation and special supervision for certain activities. The information in the plan will remain confidential and be used for no other purpose than to provide medical support.

A record sheet will be completed for each child who receives medication; this will be dated each time medicine is administered. The current sheet will be kept accessible at the place of administration, while the previous sheets will be filed with the child's Individual Health Care Plan or their personal file kept in the school office.

Parents are responsible for providing the necessary medication for their child in a suitable container which is clearly named and labelled with dosage instructions. The parent is also responsible for ensuring that any medication in school is up to date. The school health and safety representative will in addition carry out checks each term

and return any out of date medicine to the parent for disposal.

All medication for children will be kept in the school office and in general administered there. An exception to this rule will be medication for asthmatics, which may be kept in the child's classroom, preferably with the child taking responsibility for it. Also medicine which has to be stored in a fridge will be kept in the staffroom.

Medication that may be needed in an emergency will not be locked away. When this medicine is administered the parent will be informed and asked to sign the record book to acknowledge the entry.

Where medication may only need to be administered occasionally, not in the case of emergencies, the parent will be informed prior to administration. The parent will be asked to sign the record book to acknowledge the entry.

The administration of non-prescribed paracetamol or ibuprofen will not be administered by school staff.

Medicated sweets are not to be brought in to school.

## **Staff who administer medication**

At least two full time members of staff and a member of the office staff will be prepared and, if necessary, trained for the administering procedure of any medication held in the school. See appendix A for the present nominated staff.

With all medication the named person for administering medication will:

- Check log book to ensure medication has not already been administered
- Wash hands before administration
- Check correct medication has been selected
- Check the medication is being administered at the correct time and at the appropriate time in relation to meals
- Fill in log book

All members of staff, teaching and non-teaching will be informed of the needs of individual children requiring long term medication, the location of any medication and the names of staff who are responsible for its administration. In the case of any child who suffers from a potentially life threatening condition all staff will be instructed in the emergency procedure as detailed in the Individual Health Care Plan.
