

A Typical Day at Mudlarks

A typical day at Mudlarks will be filled with engaging, child led, free flowing nature-based activities within a beautiful woodland as well as the added benefit of an outdoor classroom.

Each day will be flexible and adaptable following the interests and needs of each child but with the added routine of snack, self-registration and a daily log circle talking stick discussion.

A typical day could consist of free-flow exploration, interest led activities, adventure walks, cooking on the fire pit, scavenger hunts, school readiness work, den building, construction, swinging in hammocks, pond dipping, gardening, to name a few.

At Mudlarks Forest School Nursery we want to create an environment where children are immersed in nature, fostering a deep connection to the natural world while cultivating curiosity, resilience and creativity.

Through outdoor exploration and hands-on experiences, we aim to nurture confidence, independent children who value collaboration, respect the environment and embrace challenges.

Our vision is to inspire a lifelong love for learning, where every child develops a strong sense of well-being, environmental stewardship and the skills to thrive in an ever-changing world.
